PROFESSIONAL SUMMARY

Systems Analyst and Programmer with experience in web and mobile application development. Currently focused on overseeing and optimizing workflows using AI models (Claude), combining creativity and best practices to enhance technical efficiency.

I specialize in translating requirements into scalable solutions, always prioritizing usability and effective user communication. My approach blends analytical autonomy with strong soft skills, aiming to positively impact collaborative teams through innovation and continuous learning.

PROFESSIONAL EXPERIENCE

Frontend development - AI Supervisor | July 2025 - Present | VelaOne

- Frontend Developer with experience in React and Flutter, focused on building efficient, scalable, and visually appealing interfaces. I apply best practices in architecture and performance optimization.
- I work collaboratively, providing technical support and proposing improvements in both functionality and user experience, with a strong focus on code maintainability.
- I use modern tools, including AI such as Claude, to enhance productivity and code quality. I have proficiency in technical English for reading, writing, and professional communication.

Web Development | January 2024 - July 2025 | Freelance

- Freelance Systems Analyst and Developer focused on designing and implementing custom solutions. I gather requirements and transform them into efficient, scalable, and maintainable applications.
- I cover the full development lifecycle, from architecture design to continuous improvement, delivering both technical and functional solutions that optimize processes and enhance user experience.
- I work autonomously and proactively, maintaining clear communication with clients. I have proficiency in technical English for documentation and professional collaboration.

EDUCATION

Computer Systems Analyst | March 2022 – Present

- Institución Cervantes

Programming Analyst | March 2022 – November 2024

- Institución Cervantes

IT Technician | March 2019 – December 2021

- Institución Cervantes

High School Diploma in Computer Science | March 2022 – November 2023

- Instituto José Peña

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript, Dart

Web: HTML, CSS, Formik, MaterialUI, ReduxTK, ReactRouter, Typescript, Flutter

Database: SQL Server

Agile Methodologies: SCRUM

AI Models: Claude
